SUBJECT INDEX

Absolute summability
On the absolute matrix summability of Fourier series and some associated series 351
On absolute summability factors of infinite series 367
Algebraic group
Finite arithmetic subgroups of GL_n, III 201
Algebraic number field
Finite arithmetic subgroups of GL_n, III 201
Algebraic vector bundle
Vector bundles as direct images of line bundles 191
Almost periodicity
Inverse spectral theory for Jacobi matrices and their almost periodicity 777
Arithmetic-geometric mean
On the equation $x(x+d_1)\ldots(x+(k-1)d_1) = y(y+d_2)\ldots(y+(mk-1)d_2$ 1
Auto regressive processes
Iterations of random and deterministic functions 263
Automorphic form
Zeta functions of prehomogeneous vector spaces with coefficients related to periods of automorphic forms 99
Automorphism
Some remarks on the Jacobian question 515

Bending shell model
Existence theory for linearly elastic shells 269
Bernoulli numbers
Two remarkable doubly exponential series transformations of Ramanujan 245
Birch reduction
Positive values of non-homogeneous indefinite quadratic forms of type (1, 4) 557
Bochner integrable functions
$L^1(\mu, X)$ as a complemented subspace of its bidual 421
Brauer group
Non-surjectivity of the Clifford invariant map 49

Canonical class
Non-surjectivity of the Clifford invariant map 49
Cesaro mean
On the absolute matrix summability of Fourier series and some associated series 351
Character sums
The number of ideals in a quadratic field 157
Clifford invariant
Non-surjectivity of the Clifford invariant map 49
Cohomology
Deformations of complex structures on $\Gamma\backslash SL_2(C)$ 389
Combinatorial manifolds
Combinatorial manifolds with complementarity 385
Commutator algebra
On N-body Schrödinger operators 667
Complementarity
Combinatorial manifolds with complementarity 385
Completely positive map
Kolmogorov's existence theorem for Markov processes in C^* algebras 253
Counting function
The density of rational points on non-singular hypersurfaces 13
Cusp forms
On Zagier's cusp form and the Ramanujan τ function 93

Decentralised learning algorithm
Absolutely expedient algorithms for learning Nash equilibria 279
Dedekind's eta function
A note on a generalization of Macdonald's identities for A_l and B_l 377
Deformations
Deformations of complex structures on $\Gamma\backslash SL_2(C)$ 389
Deligne's bounds
The density of rational points on non-singular hypersurfaces 13
Differential subordination
Differential subordinations concerning starlike functions 397
Diophantine equations
Row-reduction and invariants of Diophantine equations 549
Direct image
Vector bundles as direct images of line bundles 191
Distribution of zeros
On the zeros of a class of generalized Dirichlet series-XIV 167
Doubly exponential series
Two remarkable doubly exponential series transformations of Ramanujan 245

Eisenstein series
The geometry and spectra of hyperbolic manifolds 715
Elastic plate
Stresses in an elastic plate lying over a base due to strip-loading 425
Enss' method
A conjecture for some partial differential operators on $L^2(R^n)$ 705
Equivalent forms
Positive values of non-homogeneous indefinite quadratic forms of type (1, 4) 557
Exponential diophantine
On the equation $x(x+d_1)\ldots(x+(k-1)d_1)=y(y+d_2)\ldots(y+(mk-1)d_2$ 1
Exponential sums
The number of ideals in a quadratic field 157

Finite arithmetic subgroup
Finite arithmetic subgroups of GL_n, III 201
Finite morphism
Vector bundles as direct images of line bundles 191
Fourier coefficients
On Fourier coefficients of Maass cusp forms in 3-dimensional hyperbolic space 77
Fractional integral operator
On composition of some general fractional integral operators 339
Fredholm determinant
Extended Kac-Akhiezer formulae and the Fredholm determinant of finite section Hilbert-Schmidt kernels 581
Fubini-study metric
The Laplacian on algebraic threefolds with isolated singularities 435
Function fields
Reduction theory over global fields 207
Functional calculus
L^p-Estimates for Schrödinger operators 653
Functional equation
Zeta functions of prehomogeneous vector spaces with coefficients related to periods of automorphic forms 99

GNS principle
Kolmogorov's existence theorem for Markov processes in C^* algebras 253
Gamma function
Two remarkable doubly exponential series transformations of Ramanujan 245
Gaussian quadrature
Gaussian quadrature in Ramanujan's Second Notebook 237
Gaussian random walk
On the structure of stable random walks 413
General class of polynomials
On composition of some general fractional integral operators 339
Generalised Dirichlet series
On the zeros of a class of generalized Dirichlet series-XIV 167
Generating functions
Iterations of random and deterministic functions 263
Global fields
Reduction theory over global fields 207

Hierarchic control
Hierarchic control 295
Hilbert-Schmidt integral operator
Extended Kac-Akhiezer formulae and the Fredholm determinant of finite section Hilbert-Schmidt kernels 581
Hilbert-Schmidt operators
The Hoffman-Wielandt inequality in infinite dimensions 483
Hoffman-Wielandt inequality
The Hoffman-Wielandt inequality in infinite dimensions 483
Hyperbolic manifolds
The geometry and spectra of hyperbolic manifolds 715
Hypersurfaces
The density of rational points on non-singular hypersurfaces 13

Ideals
The number of ideals in a quadratic field 157
Infinite dimensions
The Hoffman-Wielandt inequality in infinite dimensions 483
Infinite series
On absolute summability factors of infinite series 367
Inverse theory
Inverse spectral theory for Jacobi matrices and their almost periodicity 777
Iteration
Iterations of random and deterministic functions 263

Jacobi forms
Modular forms and differential operators 57
Jacobi matrices
Inverse spectral theory for Jacobi matrices and their almost periodicity 777
Jacobian
Some remarks on the Jacobian question 515

Kac-Akhiezer formula
Extended Kac-Akhiezer formulae and the Fredholm determinant of finite section Hilbert-Schmidt kernels 581
Kloosterman sum
On the Ramanujan-Petersson conjecture for modular forms of half-integral weight 333
Koiter's model
Existence theory for linearly elastic shells 269

Krein's theorem
Spectral shift function and trace formula 819
Kuznetsov theorem
On Fourier coefficients of Maass cusp forms in 3-dimensional hyperbolic space 77

L^p-estimates
L^p-Estimates for Schrödinger operators 653
L-ideals
$L^1(\mu, X)$ as a complemented subspace of its bidual 421
Laplacian
The Laplacian on algebraic threefolds with isolated singularities 435
The geometry and spectra of hyperbolic manifolds 715
Lattice
Deformations of complex structures on $\Gamma\backslash SL_2(C)$ 389
Rigidity problem for lattices in solvable Lie groups 495
Lattices
On a problem of G Fejes Toth 137
Lie groups
Rigidity problem for lattices in solvable Lie groups 495
Line bundle
Vector bundles as direct images of line bundles 191
Linearly elastic shells
Existence theory for linearly elastic shells 269
Linkage
Bertini theorems for ideals linked to a given ideal 305
Local Bertini theorem
Bertini theorems for ideals linked to a given ideal 305
Local zeta function
Local zeta functions of general quadratic polynomials 177

Maass cusp forms
On Fourier coefficients of Maass cusp forms in 3-dimensional hyperbolic space 77
Macdonald's multivariable identities
A note on a generalization of Macdonald's identities for A_l and B_l 377
Markov process
Kolmogorov's existence theorem for Markov processes in C^* algebras 253
Membrane shell model
Existence theory for linearly elastic shells 269
Modular equations
Modular equations and Ramanujan's Chapter 16, Entry 29 225
Modular forms
Modular forms and differential operators 57
Modular forms of half-integral weight
On the Ramanujan-Petersson conjecture for modular forms of half-integral weight 333
Multiple exponential sum
The density of rational points on non-singular hypersurfaces 13
Multiplicative properties
Multiplicative arithmetic of finite quadratic forms over Dedekind rings 31
Multivariable H-function
On composition of some general fractional integral operators 339

N-body problems
On N-body Schrödinger operators 667
Nash blow up
Bertini theorems for ideals linked to a given ideal 305
Nash equilibria
Absolutely expedient algorithms for learning Nash equilibria 279
Neighbourhood of the critical line
On the zeros of a class of generalised Dirichlet series-XIV 167
Newton-Puiseux expansion
Some remarks on the Jacobian question 515
Non-compact knots
On polynomial isotopy of knot-types 543
Nonviscous
A proof of Howard's conjecture in homogeneous parallel shear flows 593
Norlund mean
On the absolute matrix summability of Fourier series and some associated series 351
Number fields
Reduction theory over global fields 207

Optimality system
Hierarchic control 295

Partial differential operators
A conjecture for some partial differential operators on $L^2(R^n)$ 705
Plane curves
Some remarks on the Jacobian question 515
Poisson summation
Two remarkable doubly exponential series transformations of Ramanujan 245
Polynomial isotopy
On polynomial isotopy of knot-types 543
Prehomogeneous vector space
Zeta functions of prehomogeneous vector spaces with co-efficients related to periods of automorphic forms 99
Projective variety
Vector bundles as direct images of line bundles 191
Pseudodifferential operators
Modular forms and differential operators 57

Quadratic field
The number of ideals in a quadratic field 157
Quadratic forms
Multiplicative arithmetic of finite quadratic forms over Dedekind rings 31
Non-surjectivity of the Clifford invariant map 49
Finite arithmetic subgroups of GL_n, III 201
Positive values of non-homogeneous indefinite quadratic forms of type (1,4) 557
Quadratic polynomials
Local zeta functions of general quadratic polynomials 177

r-fold basic elements
Bertini theorems for ideals linked to a given ideal 305
Ramanujan
Gaussian quadrature in Ramanujan's Second Notebook 237
Ramanujan tau function
On Zagier's cusp form and the Ramanujan τ function 93
Ramanujan-Petersson conjecture
On the Ramanujan-Petersson conjecture for modular forms of half-integral weight 333
Random maps
Iterations of random and deterministic functions 263
Rational points
The density of rational points on non-singular hypersurfaces 13
Rearrangements
Rearrangements of bounded variation sequences 373
Reduction theory
Reduction theory over global fields 207
Resolvent estimates
On N-body Schrödinger operators 667
Rigid base
Stresses in an elastic plate lying over a base due to strip-loading 425
Rigidity problem
Rigidity problem for lattices in solvable Lie groups 495
Rings of automorphs
Multiplicative arithmetic of finite quadratic forms over Dedekind rings 31
Rogers-Ramanujan functions
Modular equations and Ramanujan's Chapter 16, Entry 29 225
Row-reduction
Row-reduction and invariants of Diophantine equations 549

S-matrices
On N-body Schrödinger operators 667
Scattering theory
Scattering theory for Stark hamiltonians 599
A conjecture for some partial differential operators on $L^2(R^n)$ 705
Schatten p-norms
The Hoffman–Wielandt inequality in infinite dimensions 483
Schrödinger operators
Scattering theory for Stark hamiltonians 599
L^p-Estimates for Schrödinger operators 653
Self-adjointness
The Laplacian on algebraic threefolds with isolated singularities 435
Sequences
Rearrangements of bounded variation sequences 373
Series approximations
Gaussian quadrature in Ramanujan's Second Notebook 237
Shear flows
A proof of Howard's conjecture in homogeneous parallel shear flows 593
Shear stresses
Stresses in an elastic plate lying over a base due to strip-loading 425
Shear surface loads
Stresses in an elastic plate lying over a base due to strip-loading 425
Siegel theorem
Multiplicative arithmetic of finite quadratic forms over Dedekind rings 31
Singular locus
The density of rational points on non-singular hypersurfaces 13
Singularities
The Laplacian on algebraic threefolds with isolated singularities 435
Smooth base
Stresses in an elastic plate lying over a base due to strip-loading 425
Spectral shift function
Spectral shift function and trace formula 819
Spectral theory
Scattering theory for Stark hamiltonians 599
Sphere (balls)
On a problem of G Fejes Toth 137
Stable processes
Iterations of random and deterministic functions 263
Stable random walks
On the structure of stable random walks 413
Stackleberg terminology
Hierarchic control 295
Starlike and convex functions
Differential subordinations concerning starlike functions 397
Summability factors
On absolute summability factors of infinite series 367

Symplectic structures
Symplectic structures on locally compact abelian groups and polarizations 217

Thinnest arrangements
On a problem of G Fejes Toth 137
Three folds
The Laplacian on algebraic threefolds with isolated singularities 435
Three-dimensional hyperbolic space
On Fourier coefficients of Maass cusp forms in 3-dimensional hyperbolic space 77
Trace formula
Spectral shift function and trace formula 819
Triangular matrix
On the absolute matrix summability of Fourier series and some associated series 351

Univalent
Differential subordinations concerning starlike functions 397

Vector measures
$L^1(\mu, X)$ as a complemented subspace of its bidual 421
Vertex operator algebras
Modular forms and differential operators 57

Zariski density
Rigidity problem for lattices in solvable Lie groups 495
Zeta function
Zeta functions of prehomogeneous vector spaces with coefficients related to periods of automorphic forms 99
